

# Aleks Sieriakov

Junior Python Django & JS React Developer

## SUMMARY:

An ambitious specialist with a strong interest in web development and design. Possess solid knowledge of web-development, and experience working with tools like Git and Figma. Strive for continuous professional growth and am ready to collaborate in a team to create high-quality web applications. I have excellent communication skills and the ability to quickly learn new technologies and tools.

## PET-PROJECTS:

### [Full-Stack Music Streaming App](#)

Developed a music streaming platform using a **microservices architecture**. The backend consists of multiple **FastAPI** services, containerized with **Docker**, and connected via **RabbitMQ**. Integrated **Redis** for caching, **PostgreSQL** for data persistence, and **Elasticsearch** for full-text search. The frontend is built with **Next.js** and served via **Nginx**. Managed service orchestration with **Docker Compose**.

### [Blog](#)

Developed a full-stack Blog using **Django** and **Next.js**, with features like creating post, like post, comment post, change profile, user authentication using **JWT**, and a responsive interface. Utilized **Django REST Framework** to ensure efficient API communication between the backend and frontend.

### [Color Picker app](#)

### [Link to the app](#)

Developed a **Next.js** Color Picker is a compact, open-source app built with **Next.js**, offering a lightweight color selection tool with real-time previews, hex code outputs, and a clean interface. Hosted on **Vercel** with a clean, responsive UI, making it ideal for quick customization and real-time previews.

## EXPERIENCE:

- I worked as a **freelancer** on a project for a restaurant management system, where I developed a backend using **Django REST Framework**, PostgreSQL, and integrated user roles, menu management, and order processing.
- I was part of a **startup focused on selling in-game currency**, where I helped build core backend logic using **Django and Celery**, implemented payment systems, and worked with APIs for game integration.
- I also completed a **3-month internship** as a **Python/Django Developer**, where I gained hands-on experience with REST APIs, database design, and collaborative development using Git and Agile practices.

## SKILLS:

### • **Programming Languages:**

Python, JavaScript, TypeScript  
,HTML, CSS, SQL

### • **Web Frameworks:** Django,

React, Next.js, Bootstrap,  
TailwindCSS

### • **Web Technologies:**

WebSockets, REST API

### • **Tools & Platforms:** Docker,

Vercel, AWS, Firebase, Nginx

### • **Databases:** PostgreSQL,

MySQL, SQLite, MongoDB,  
Redis

## LANGUAGES:

English (B1)

Russian (Native)

Ukrainian (Native)
